Ricardo Duenas, Administrator
Super Environmental Protection Agency
P.O. Box 2999
Agana, Guam, 96901

Dear Mr. Duenas:

As you know, the Environmental Protection Agency is in the process of developing a list of hazardous waste sites which potentially could receive funding for remedial cleanup action under Superfund. We feel that it is very important to seek the greatest amount of local input as is possible. Based on earlier discussion with OEPA staff we were informed that the Ordot Landfill was a site of priority interest. We have therefore submitted the Ordot Landfill to EPA Headquarters as a priority site.

It is now necessary for us to verify that this is a priority site in your estimation and to gather some information on the site. We therefore seek your assistance in two areas. We request that you confirm that the site is your "highest priority" and that you complete the enclosed MITRE scoring sheets for the site. The scores are being used to provide a national assessment of site severity and to provide a basis for funding decisions. There is no cut-off score for funding. The highest priority site from each State and territory will be given high consideration.

If you have any questions concerning this, or if we can provide any information, please contact me, or call Mr. Bruce Lery, ((415) 556-5695) of my staff.

Sincerely yours,
